

\$2.00 A YEAR

Ten Thousand Dollars

Realized at Tax Sale
MORE MONEY RECEIVED THAN AT CALGARY SALE
HELD PREVIOUSLY—224 PARCELS SOLD

The tax sale held by the Department of Municipal Affairs on Thursday last week at the Town Hall, Bassano, brought in \$10,197. Inspector A. Fidler conducted the sale. 224 parcels being disposed of. The amount received exceeded the sum taken in at a similar sale held in Calgary a few days previously. The land sold for taxes was farm property, and the owner has 12 months to redeem. J. S. Dignan, of Toronto, and J. Whitaker, of Calgary, were the heaviest purchasers. Those who buy the property get ten per cent. on their money if it is redeemed. Mr. Fidler was much pleased with the success of the sale.

Decision to Hire Town Policeman

APPLICATIONS CALLED FOR NOVEMBER 17th AT A SALARY OF \$100 MONTH—COUN. TRAVIS REGISTERS OBJECTION.

The council decided to appoint a police constable, at the meeting held last Monday, and left the job of selecting the proper individual with the police committee. Applications are being called for in this issue of The Mail. It was over the objection of Coun. Geo. Travis that the recommendation was made, all the other councillors being in favor.

The police committee brought in a recommendation to secure the services of a policeman and pay him \$2.50 for each conviction, the limit to be \$100 a month. This report was the subject of some

leaching criticism and was hurriedly rejected.

The provincial government is determined that the town should maintain a policeman and Sergt. Wight, of the A.P.P., has been instructed not to perform police duties in Bassano. This left the matter strictly up to the council.

Minimum Price for Lots

The town council has been informed to fix a minimum price for lots to be sold at the tax sale reported. They fixed a low price which is to be kept secret. Lots that fall into the town's hands may be purchased at a very reasonable figure, however.

Sheepmen to Fight Hoadley's Order

FIRST GUN IN BATTLE TO SECURE PRIVILEGE OF THE RANGE FOR SHEEP TO BE FIRED HERE THIS WEEK

The sheepmen are planning to fight Hon. Geo. Hoadley's order refusing them range in closed areas.

J. D. Watson, of the Knight-Watson Co., one of the biggest sheep-owning individuals in the province, was in town Saturday and said the legal battle will be carried to the Privy Council if need be.

Sergt. Wight, of the provincial police, has charged J. W. Williams and his men with ranging sheep at Latham, contrary to the Hoadley order and the fight opens in the courts before Magistrate Bond on Friday.

The sheepmen are working in conjunction with the order that Hon. Mr. Hoadley's ground base their fight on the ground

ultra vires in that he was not a duly elected member of the cabinet and minister of the Crown when he made the order. He has been appointed minister of agriculture but has not been re-elected as required by law.

Hon. Mr. Hoadley is a horse rancher and the sheepmen feel that the old animus held by all ranchers against sheep is cropping out in the order he made. Under the Stewart government a farmer owning a quarter section could pasture 300 sheep on the range, but Hon. Mr. Hoadley went further and has ordered all sheep off the range. This means the elimination of sheep raising by anyone in these parts.

Plans of the U.S. Grain Growers

U.S. GRAINGROWERS PLANS

The farmer leaders of Western United States have been working on plans for economic betterment for the last several years. Their efforts culminated in the formation of the United States Grain Growers, Inc., a non-profit, non-stock association, to handle and sell grain for its farmer members. This company will try to stabilize grain prices by orderly marketing, as demands, war, and by direct contracts with mills and consumers; eliminate short-selling and manipulated markets by keeping the grain in farmer control until sold to a legitimate buyer; export or pool for export, the surplus of bounteous harvests to keep the grain speculator from heating the market with time prices; furnish credit through the Farmers Finance Corporation, to grain growers who do not want to sell at harvest time; supply reliable news of all world markets; clean, mix and recondition grain; eliminate unnecessary and harassing handling charges by shipping directly from the country stations to the miller or exporter; and prorate the savings made by these trade devices back to the farmer in proportion to the grain he markets.

Layzell is offering thirty head of work horses at auction at the Bassano stockyards on this coming Saturday afternoon. These are some of B. H. Bunney's horses.

Sask. Farmers' Grain Problem

FARMERS IN SASKATCHEWAN DECLARED TO BE SELLING THEIR GRAIN FOR LESS THAN THE COST OF PRODUCTION, AND THE PROVINCIAL GOVERNMENT, FOLLOWING THE

policy of a recent article in a local journal, is contemplating action, which, if successful, will mean millions of dollars to the now distressed agrarians. Briefly the government proposes research into the milling values of wheat, with the object in view of securing for the value of his wheat the farmer a price based on present terms of trade. At the present time the farmers are securing about fifty cents per bushel for their wheat, while the price of No. 1 Northern is above the dollar mark. According to the provincial government, the present situation is a desperate one for the farmer. The government hopes, that for milling purposes damp or tough wheat has the same value as brighter and better looking samples, a vast saving to the farmers in seasons such as the present one will be effected. With a considerable proportion of this year's wheat crop in Saskatchewan more or less affected by the wet weather of September, much of the grain is grading below No. 1.

PEACE THINGS

At the Anglican Church on Sunday, November 18th, at 11 a.m. everybody welcome. Celebration of the Holy Communion by the Bishop at 8 a.m.

Commission For Southern Alberta Grain Enquiry May Now Be Continued

Understood From Meighen's View to Having Investigated the Situation Carried on Without Further Delay.

It is altogether likely that the grain investigation, which was halted by an injunction on the application of the grain companies, will proceed with immediately now that the Manitoba court of appeal has decided that the commission is a legally constituted body. Premier Meighen was asked whether the investigation would proceed immediately, and intimated that this question was one for the commission to decide. He preferred not to be quoted in the matter. He has stated from the platform on different occasions, however, that the investigation is not to be shut off and has produced enough evidence to assure him that it must proceed and that the whole grain business must be sifted to the bottom.

1. To recommend a definite irrigation policy based on the reports of the Dominion reclamation service including the settlement and development of irrigation tracts.

2. Survey and classification of those areas which cannot be irrigated with recommendations as to possible farming methods or other uses for such areas.

3. By individual farm surveys to inquire into the financial conditions of farmers in the drought areas, with a view to recommending a policy for the liquidation of present financial obligations, including provincial and Dominion advances or seed grain and relief, and also the maintenance of credit.

To make recommendations for the re-establishment of municipalities and school districts.

One of the immediate duties of the board will be to consider cases of temporary financial distress and to arrange the co-operation of creditors in the amelioration thereof.

After the board is constituted the government will consider with it the permanent form of organization and the legislation necessary to carry out its purposes.

Mayor Hyland, the Tammany choice, has been re-elected.

Edmonton and Winnipeg rugby teams play for the West-Edmonton derby on Saturday.

Alberta doctors have suggested to the attorney general that they be allowed 25 per cent. more.

Gall-Curti selected W. L. Mackenzie Bowden as the man he would prefer to marry of the three Canadian political leaders.

E. F. Ryan has been nominated by the Liberal of West Calgary to oppose R. B. Bennett and Jos. Shaw, the Independent Liberal.

A. G. Bond is the secretary of the curling club and all who are intending to curl should pay their dues to him.

Forster And Mavor

The feature of the Fulton meeting on Wednesday night was a tilt between J. S. Mavor and G. Forster, M.L.A. for the Hard Hills.

Mr. Forster commenced by asking questions of Mr. Mavor, such as what caused the hard times in 1914; would the Meighen government take any step to negotiate trade treaties with any countries such as a reciprocity pact, and such like.

Mr. Mavor replied - that periods of hard times come at certain intervals and no effort of man has been able to prevent them in any country. Certain the governments are not responsible. He said the Meighen government would never enter into a trade policy such as the reciprocity agreement for the reason that it was a treaty and could be broken at a brief notice, and therefore lost any merit it might have.

The affair entered into quite an interesting controversy in the course of which Mr. Mavor got Mr. Forster to admit that he did not follow the leadership of Crerar, and followed President Wood of the U.G.G. Mr. Forster also said he would be in favor of a grain marketing pool such as outlined by the United States Grain Co. Inc., and which is being advocated for Canada by A. C. Weaver.

That would be opposed to Mr. Crerar as conflicting with the United Grain Growers. Mr. Forster said he still approved of it.

Fulton Opens Political Campaign in Bassano

ADDRESSES MEETING IN BASSANO AND CREATES A GOOD IMPRESSION IN BRIEF SPEECH.

Government candidate in Bow River riding, W. R. Fulton held an organization meeting and rally at the rink on Wednesday night. Dr. Scott was chairman and introduced the candidate as a good Liberal and a man who was well thought of. Mr. Fulton delivered a short speech, the first political address he had ever made, and created a very favorable impression.

"I am a businessman and not a politician," he said, "and I took the nomination of the government party believing it to be my duty to do so. I believe Canada is now facing the worst period in its history and if the Meighen government is not returned to power times will be worse."

He stated that he runs two stores in Drumheller and does a big business with farmers, and realizes they are having their troubles. He has extended credit to his farmer customers and is still doing so.

Although he realizes it will be three years before some of the benefit will be able to pay him.

U.F.A. DESIRE FULTON TO JOIN WITH GARLAND

The executive of the Bow River U.F.A. constituency association has invited W. R. Fulton, the Conservative candidate in the riding, to hold a series of meetings jointly with E. J. Garland, the U.F.A. candidate, during the election campaign. By this means Mr. Fulton would be able to take full advantage of the schedule of meetings now being arranged by the executive of the U.F.A. association in conjunction with the local throughout the riding. He would thus be provided with the fullest opportunity of addressing the electors of Bow River in which the U.F.A. is stronger numerically than in any other riding.

The suggestion is advanced by the Bow River executive of the U.F.A. is the hope that this means the issues upon which the electorate will vote on the 6th may be as fairly presented as possible to all the voters. The suggestion is considered a proposal but has not decided whether this offer can be accepted.

The U.F.A. proposes that all the expenses incurred in connection with this series of meetings shall be met jointly by the U.F.A. district association and the association supported by Mr. Fulton, on a fifty-fifty basis. Following is a list of meetings arranged for Mr. Garland in this locality:

Nov. 12, Milo
Nov. 21, Cluny
Nov. 22, Duchesne
Nov. 23, Patria
Nov. 24, Bassano.

Fulton Opens Political Campaign in Bassano

ADDRESSES MEETING IN BASSANO AND CREATES A GOOD IMPRESSION IN BRIEF SPEECH.

Being a farmer's son and raised on an Ontario farm, he had every sympathy with the farmer, but he had made a big mistake when they have grouped themselves and declared they do not need any other class in the community. "If any one organization has the right to step out and say they will run this country, it is not the farmers, it is the returned soldiers," Mr. Fulton declared.

Referring to the tariff, Mr. Fulton said that without a tariff Canada would have no industry to speak of, and until the west the country will not develop as it should. Once they start making goods here, watch this country grow, he said.

Mr. speaker said that the U.F.A. candidate had offered to hold joint meetings with him (Fulton) but he was always ready to make things his own business and would not be lent to a system of meeting held out for the particular benefit of the U.F.A. man.

Mavor Speaks On Present Day Politics

MAKES SPIRITED ADDRESS AT FULTON MEETING AND DEALS WITH GROUP GOVERNMENT AND A TARIFF

John S. Mavor gave a detailed and lengthy declaration of the policies of the Meighen government in the Bow River riding on Wednesday night. He spoke on behalf of the U.F.A. and dealt with group government and a tariff.

Excerpts from his speech are as follows:

"The tariff is needed for revenue. Direct taxes are hard to get. It is a question of such that people hate to pay that way. By tariff taxation we can raise the first eight months of the year."

In Calgary alone, there are 234 industries but through protective tariff, which produces 32 million dollars worth of goods, it is a year.

I am heartily in sympathy with the plan brought forward by A. C. Weaver for a grain marketing pool. The U.G.G. men get higher salaries than are paid by any of the grain companies. It is a question of judgment by the amount of the farmer's money they get in the process.

Mr. Forster stated that Mr. Meighen is associated with big business, which is not so, but on the other hand, Mr. Crerar is associated with one of the greatest corporations in Canada today.

Miss Alice McPherson, of Calgary, spent a few days in town visiting her mother. Coming shortly, "The Affairs of Anatolia."

Miss M. C. Gilchrist, of Hanna, has taken the position on staff left vacant by the departure of Miss Robinson. The latter has gone to Philadelphia, Penn.

G. A. Forster, M.L.A. for Hand Hills, was in town this week. He states that he has started a number of gangs on roadwork to relieve the hardships caused by drought in his constituency.

Applied for, and be on printed forms which may be obtained by writing to the Dominion Cerealists, Experimental Farm, Ottawa.

As the stock of seed is limited, farmers are advised to apply early to avoid disappointment. Those who applied too late last season are particularly requested to send their applications at once as application forms may be forwarded to them.

No application forms will be sent out after Feb. 1, 1922. —C. E. Saunders, Dominion Cerealists.

FREE SEED DISTRIBUTED

The annual free distribution of samples of seed grain will be conducted as usual at the Central Experimental Farm, Ottawa, by the Dominion Cerealists.

The following kinds of seed grain will be sent out this season: Spring wheat (in about 5-lb. samples); white oats (about 4-lb.); barley (about 5-lb.); beans (about 2-lb.); flax (about 2-lb.); and clover (about 2-lb.).

Only one sample can be sent to each applicant.

As the stock of seed is limited, farmers are advised to apply early to avoid disappointment. Those who applied too late last season are particularly requested to send their applications at once as application forms may be forwarded to them.

RELIEF COMMISSION

The Alberta government has decided upon appointing a commission to investigate the situation in the drought-ridden portion of Southern Alberta. Presumably this commission will gather evidence from the localities affected and arrive at a conclusion upon which the government can build a definite policy.

The Lomd Press, situated in the heart of a district that has suffered greatly, is not in accord with the commission proposals, and states that the dried-out farmers are not enthusiastic over Premier Greenfield's plan. They suspect the commission's sittings will merely furnish a debating ground for agricultural theorists, and the results will be similar to those obtained by the general run of appointed commissions.

The Mail believes that such a commission will prove more valuable than the affected farmers believe. It is a very fair way to thoroughly probe a situation and give the legislature definite and authentic information to work on. The only objection is the slowness with which the appointment has been made.

SHEEP ON THE RANGE

It is a short-sighted agricultural policy to prohibit sheep running on the range, as has been done by Hon. Geo. Hoadley, minister of agriculture.

The Stewart government allowed farmers owning land to run a certain number of sheep in proportion to the land they owned, on the open range, but Hon. Mr. Hoadley has changed this and apparently wants the farmers to keep out of the sheep business. Sheep raising has been profitable in the past and when the adverse features of agriculture right themselves, it will undoubtedly again be a money-making branch of farming. It should receive encouragement instead of endeavoring to kill the industry.

Another feature lies in the establishing of a market for fodder. Alfalfa and other fodder crops will be raised in

immense quantities in the district in a short time, and markets have to be found to dispose of this feed. Sheepmen have been ready buyers in the past and if encouraged question has many features and is worthy of more deep thought than the minister of agriculture apparently gave it.

THE FACTOR OF SUCCESS

A farmer wrote The Mail last week complaining of agricultural conditions in Alberta and laying the entire blame upon the country for certain failures made by men who have come here from the United States to farm.

The Mail believes the letter was rather unfair to Alberta. A country or a province cannot be condemned for the failure. The factor of success lies with the individual to a great extent.

It is true that many came to this section with the hope that in a few years they would be comparatively wealthy, and have been disappointed. They stated farming when everything they had to buy was at the peak of high prices, and now the prices they obtain for their produce is at a very low ebb. This is indeed, an unfortunate situation. At the same time it prevails in every branch of endeavor in which men exert effort. Last week we read in an authoritative

journal of the tortuous road by publication that the great majority of States exporters to South America, during the war, were lost within the past two years. Manufacturers, wholesalers and retailers have suffered tremendous losses and bankruptcies galore have followed. This is a condition of affairs over which the human mind, apparently, has no control. It is the same with farming. The commission appointed by the United States government to investigate the woes of the farmer in that country, gathered volumes of evidence from the disgruntled agriculturalists. Men told of crops failing to pay the interest alone, on their farms, without reckoning a cent for the farmer's efforts, for men's wages, living expenses, etc. In another case the taxes on a man's farm had eaten up the entire proceeds of the harvest.

The list of calamity stories was astounding. Canada is not the only country suffering in this respect.

Alberta is a new country and trials must be overcome by the pioneers before the ultimate success is attained. Mistakes of many kinds are made and experience must be the teacher. We hear of men on irrigated farms getting poor crops, and they cannot understand why they have not been more successful. At the same time we also hear of men getting excellent crops and achieving steady and consistent headway along the road to prosperity. Conditions are different, we are free to admit, but the human factor must predominate. Charles Jones, a Gem farmer got over 40 bushels of wheat to the acre this year. Louis Lendrum, of Duchess, in a recent letter tells how he got 30 bushels of wheat and a good stand of alfalfa grown with wheat this year. A Rosemary farmer got over 40 bushels of wheat on irrigated land this year and W. S. Mundell, of Sutherland, threshed 47 bushels of wheat to the acre on a forty acre field. Many similar incidents may be cited to prove that success is being achieved with a crop which is not looked upon as a profitable one in an irrigation district. We repeat that there may be more favorable conditions, such as older worked land, assisting these men who have secured such excellent crops, but the point of the argument is that the crops were actually grown and what one man can do, another can also accomplish.

A nation cannot be hazily condemned for the actions of one man or a group of men; neither can be a country condemned on the basis of a few failures.

LEAVING THE FARM

The report is quite general that many young farmers who have become discouraged with farming conditions the past year are considering seriously the giving up of farming. There has just made a start in the business. We refer particularly to the young men who business, either during or since the war. The renter has had the greatest difficulties in making ends meet; likewise the young man who has made an initial investment in farm land and who has been trying to work his way out. The loss of such men to agriculture would be a serious calamity, and we would like to make a few suggestions to all who are thinking of giving up the farming game at this time.

In the first place, every farmer who is disgusted with farming as an occupation should remember that the average man in business or in the trades feels towards his particular calling just about as the farmer feels about farming. Farmers have taken a little more grief the past year than have businessmen, they both face the same problem of adjusting themselves to new conditions incidental to reconstruction. There are just as many, if not more blue and pessimistic businessmen than there are farmers. In fact the average businessman has not shown nearly so much gameness as the farmer has shown in going through the tough spots. Millions of the city can testify to their willingness to trade places with the farmer. If there are any soft snaps for any worker these days, we fail to see them. Verify these statements for yourself before you give up farm life.

We see no reason why farming will not be more attractive in the future than it has been in the past for those who farm intelligently. There are just enough people in this country who crave city life to make wider the gap between consumer and producer, and the production possibilities as regards foodstuffs. Supply and demand of the future are bound to make attractive the business of producing vitally necessary food products, at least attractive enough to keep producers at work. There is no getting away from the fact that cities cannot live without farm land back of them to feed them and supply materials for their labors.

There is nothing in world conditions just now that would indicate a revolution in the methods of living and methods of doing business that prevailed before the war. We

will eventually get down to what we formerly knew as permanent prosperity and square deal to all. But it takes time to recover from the greatest war in history, and the country which thought itself prosperous because of the war is now paying its full share of that war—St. Paul Farmer.

THE UPLIFTER

(High River Times)
Have you ever observed in passing through this vale of tears, that the uplifter, who holds his hands up in holy horror at any misdeed on the part of the average citizen, is at heart a damned contemptible blither, and delights in creating trouble among his fellowmen. As a general rule, he has no regard for common decency, and while he may not take a drink or not hesitate to make false accusations against his neighbor without any thought of the misery it may cause. Personally, we have little use for such play golf on Sunday, he will individuals.

Layzelle is holding a sale of some of the horses raised by B. H. Bunney, on Saturday. Chicago price for No. 2 hard wheat is \$1.06, while No. 2 Northern is \$1.12.

Latham

A. Koukovecky and family are at present staying with H. Nelson. Mr. Koukovecky's home is nearing completion and from appearances it promises to be a "real" home. We all wish him success in his new undertaking.

Miss Nelson left for her home in the States last week. A splendid entertainment was held at the school house last Friday night. It was given as a Halloween Party in thanks for Rev. Mr. Lytle's splendid sermon delivered here the summer. Everybody brought a present in the form of chickens, apples, carrots, cabbage, and several other vegetables. These were given to Mr. Lytle but he had to have the most of it brought to Bassano, as there was too much for him to take. Several games were played and ghosts were in great evidence. Mr. Roy Powell being "Chief Ghost." Mrs. Geo. Smith was the old witch that told fortunes. Mr. Lytle kept the ball rolling and everybody's a splendid time.

Sunday school will close for the winter on Nov. 13. Let's have a big crowd turn out to "the last Sunday."

Mr. and Mrs. J. Heselin have returned from Calgary. They are staying at the Dominion Farm.

The ladies of Latham have formed a club and are going to make a desperate try to raise enough money to build a hall here. Countess built one; why can't we?

Crowfoot

Sydney Rodbourne returned from Gleichen where he has been attending school, to spend Thanksgiving with his parents.

Winter sprung upon us with a vengeance, alright. Mr. Frank Murchison was a caller from Calgary over Sunday.

The Misses Edith and Alice Rodbourne, accompanied by Miss Rollison, of Calgary, arrived Saturday evening to spend Thanksgiving with their parents, Mr. and Mrs. Chas.

THE CHURCH OF THE BLESSED VIRGIN (Anglican)

Services held at following times:
1st and 3rd Sunday in the month, 7:30 p.m.
2nd 4th and 5th Sunday in month, 11 a.m.
Sunday School 3 p.m.
Visitors cordially invited.

Gen

Misses Woodhull, Copping and Reid attended the teachers' convention at Brooks on Friday.

Frank Ewing, motored to Calgary on Thursday. The W. I. met at the home of Mrs. M. E. Derham on Wednesday.

Mr. Arshack spent Friday with Mrs. Harry Stepp. Mrs. Jones and Mrs. Mar-
ques were callers at the Self-
ridge home on Friday.

A number of men with their horses, met at the school house on Saturday and made a skating rink which should promise good sport for the young folks this winter.

H. F. Richard, of Bassano, was in Gen Friday evening. Mrs. McGuire spent Wed-
nesday with Mrs. Foley. Mr. and Mrs. E. B. Bramble and children, Charlie and Vera, spent Thanksgiving with Mr. and Mrs. E. Brook at Duchs.

Mr. and Mrs. F. C. Richard and daughter went to Bassano Thursday to see their grand-
daughter.

Rev. Migeot was a Bassano caller Thursday.

Mr. and Mrs. Ralph Robson and family were guests of Mr. and Mrs. Stanley Selfridge on Sunday.

Miss Woodhull and Miss Reid spent Sunday at the C. A. Fryberger ranch. Mr. and Mrs. C. A. Wal-
tman and family and Mr. and Mrs. M. E. Derham were guests of Mrs. Schmitzer on Thank-
sgiving day.

The Thanksgiving dinner given by the Ladies' Aid at the school house was well at-
tended and a good time re-
ported.

Countess

Mr. Cleve has just finished building a new chicken and pump house.

Miss Charlotte Ferguson, who teaches at Burns Brae, spent the weekend at Brooks where she attended the teachers' convention.

Howard Ferguson is having his house painted. Mr. Churchill, who is a expert decorator, is doing the work.

Mrs. Cleve entertained the Institute at her home on Thurs-
day. A good crowd turned out and all spent a most en-
joyable afternoon. A delicious lunch was served at five o'clock. The next meeting will be held with Mrs. Churchill. Mr. Sam Cory will spend the winter here with Mr. and Mrs. Havecock Churchill.

Messrs. Ralph Burrows, Jimmie Heidt and Claude Snyder went to the mines for coal the last of the week, returning Sunday evening.

There will be an entertainment at the Countess Club house on Christmas Eve. The ladies are already working on the programme and expect to have a good one. There will be a tree and a real Santa Claus.

The joint meeting of the U.F.W.A. men's evening was well attended. A good number, both from Bassano and Gen, being present. Mr. Weaver delivered a very interesting address on the Wheat Pool. Mr. Chamberlain and Mr. Beck gave short talks which were both helpful and interesting. Good eats were brought from all directions which were enjoyed by all. Mr. Cleve, with his drums, and Mrs. Durham, of Gen, at the piano, furnished the music, while a number of the "young" folks danced.

THE CITY MAN AS A FARMER

(continued from page 3)
agricultural activities, have through intelligent study and close application of the best farming methods, surpassed the efforts of those agricultur-
ists who have continued doing things on the farm in the way their fathers used to do them.
City Boys' Greatest Prize
Winners

One might mention the Sas-
katchewan "Wheat Wizard",
Seager Wheeler, who has car-
ried off the world's wheat
championship no fewer than
six times. The son of fisher-
folk in the south of England
he spent his early years as a
book-stall clerk and his farm-
ing knowledge was nil when he
took a western homestead. The
Hill family, of Lloydminster,
Alberta, which has carried off
the world's oat championship
so often, were also inexperi-
enced city folk from England
when they settled in the West.
Samuel Lacombe, of Manitoba,
who won the wheat champion-
ship two years ago, was also an
English city boy. J. C. G.
Facts of Cayley, Alberta, who
attained the international oat
championship at Chicago last
year, started life in England,
Ontario, and when he took a
western homestead had neither
money nor experience. Old

farmer Maynard, who cran-
Seager Wheeler a close second
for championship in 1912, was
a successful tailor in England
before the call of the land
brought him out to Manitoba
to raise prize wheat. Frank
Collicutt, the Alberta rancher
whose Hereford herd is re-
stocking many farms all over
the American continent, was
also a city boy, and when he
made his commencement as an
agriculturalist had only the
wherewithal to purchase one
cow, which became the founder
of the huge herd of purebred
Willow Springs, Nick Taitner,
the Alberta barley champion,
whose crop each year leaves
the country at fancy prices, not
only had the supposed handi-
cap of a youth spent in a Bel-
gian city, but was minus one
arm and capital which would
have been useful. Nevertheless,
he manages to run the farm
himself and has made his
name internationally famous.

Inexperienced city men need
not fear getting out upon a
ranching career in Canada, or
anticipate any disaster, as long
as they do so in the recogni-
tion of the high standing of the
occupation, and with the intent
of following out its duty as
such, in which they will find all
assistance available. The fun-
damental reason of the immi-
gration to Canada is settlement
upon Canada's fertile tracts
to acquire a piece of good
earth to hold for all time.

Buy an Irrigated Farm

From the Canadian Pacific Railway

Irrigation makes the farmer
successful culture of alfalfa,
and raises good crops, not oc-
casional, but EVERY YEAR.

Irrigation makes possible the
successful culture of alfalfa,
the king of fodder, which in-
sures good returns in dairying
and mixed farming.

Irrigation means intensive farm-
ing and close settlements, with
all the advantages of a densely
populated agricultural community.

Irrigation in the Canadian Pacific
Railway Irrigation Block is no
finger an experiment, the years
that it has been tried out having
absolutely demonstrated its success
wherever intelligently applied.

This is the most liberal offer of irrigated farm land on record.

For full particulars apply to

Biggest Thing Of It's Kind Ever Seen In New York Says Druggist

The fact that 435,000 bottles of Tanic have been sold in the State of New York since its introduction there last year is a record for any business item that will attract unusual attention throughout the entire State, according to the druggist who is selling it. It breaks all records.

Mr. George H. Evans, manager of the Othello-South Company, the well-known wholesale druggists, with branches in Albany, Buffalo, Rochester and Syracuse, recently announced that the preparation was now selling in their trade territories about at the phenomenal rate of approximately 500,000 bottles a year.

"It is the greatest success," said Mr. Evans, "this state alone has sold more than 435,000 bottles of Tanic in the last year. This is a tremendous figure, but I am really conservative in making this statement."

Tanic is sold by leading druggists everywhere.

World Happenings Briefly Told

A catch of 62,000 pounds of fish was landed at Boston recently. It was the largest in years.

The Prussian military has resigned. Its decision was taken after the fall of attempts by Premier Siegelward to reconstruct the ministry.

Fire destroyed the auditorium of the Kabukita Theatre, one of the largest and oldest in Tokyo. The loss is estimated at \$1,500,000.

Terrestrial rains in Western Guatemala have done great damage to property and have caused floods in which 15 persons have lost their lives.

Joseph Simonetti was found dead, head downwards, in a vat of wine, allegedly to have been illicitly made, at his home in Los Angeles.

Three generations of a family were wiped out at Hoy near Tacoma, Wash., when a Great Northern train crashed into an automobile, killing four persons.

A Russian's cable from Melbourne says statistics furnished by the Australian Government show that wages rose \$1,550,000 last year in wages through 554 industrial strikes.

Terminating her thirty-third inward voyage, the Trans-Pacific liner Empress of Russia reached Vancouver from the Far East. She brought in 400 million passengers, 75 second class and a large Atlantic steamer lift.

Paper money reaching the enormous total of \$750,000,000,000,000 has been issued by the Soviet Government, and the latest output being 750,000,000,000,000 in new money for the opening of the National Bank.

Nicholas Shaffer, a pioneer contractor of British Columbia, was killed when a tree fell on him at his home near Kamloops. He was born in Woodbridge, Ont., 71 years of age, and had resided in British Columbia several decades.

Twenty-four hours after they had shaved, a shipment of frozen swine from China, Paris health authorities say, they found the eggs contained 28,000 harmful animal parasites. The officials advised against their use, except for biscuit making.

Between 275 and 280 million units employed at Mine No. 26 of the New York Coal Company at Floodwood, Ariz., Ohio, went on strike as a protest against the check of injunction issued by Judge Anderson in Federal Court at Indianapolis.

James McIntosh, formerly of Glasgow, N.S., a veteran of the Great War, started from St. John with the intention of travelling around the world. He expects to complete the globe in five years.

Two men in a small boat were rescued at the brink of the rapids above the falls at Niagara. They were rescued after three hours. The pair lost an ear while on the river and had drifted to ward the rapids. Fortunately they bumped against a crib to which they clung until rescued.

The Block Signals Are Working

In some respects, human experience is like railroad.

Every moment of the business and social day the block signals are giving right of way to keenness and alertness—while the slow and the heavy must wait on the sidetrack for their chance to move forward.

The ability to "go through" and to "get there" depends much on the poise of body, brain and nerves that comes with correct diet and proper nourishment.

That's why so many choose Grape-Nuts for breakfast and lunch. Served with cream or milk, it is completely nourishing, partly pre-digested, and it supplies the vital mineral salts so necessary for full nutrition.

Grape-Nuts has a rich, delightful flavor, is ready to serve on the instant and is distinctly the food for mental and physical alertness and speed. At all grocers.

"There's a Reason" for Grape-Nuts

Noted Explorer Dies

William Spiller Bruce Made Several Trips to Far North

William Spiller Bruce, explorer and author, in died. Mr. Bruce was born Aug. 1, 1867, and was educated at the University of Edinburgh. He was noted for his geographical work at the British Antarctic expedition in 1912. He continued his polar researches in 1914 when he went into the north frigid zone with the Jackson-Harmsworth polar expedition. He remained in the Arctic for two years and later made three voyages into the far north as naturalist for the Prince of Monaco.

Have You Stomach Rinsing, Gas, Heartburn, Sourness? Tels of a Simple Remedy

It's really wonderful, the quick relief you get from ten or twenty drops of Dr. Williams' Pink Pills for Pale People. For cramps and spasms, Nervine is equally effective. To prevent your stomach from becoming sour, take a bottle of Dr. Williams' Pink Pills. It will relieve the minor aches and pains of the whole digestive system, and give you a clear conscience.

Survivors In Far North

Found Indians Who Had Never Seen White Men

Government surveyors and engineers carrying their lines across the far northern parts of the Mackenzie River during the past summer, have reported the result of the Carpenter-Dempsey expedition as follows: The Mackenzie River, from its mouth to the Arctic Ocean, is a continuous line of rapids and falls. They received news daily from Japan, Cuba and the Philippines, and every 24 hours they checked their lines with the chronometers at Annapolis, Md.

All this they did by means of a portable chronometer, which was carried by one of the three Dominion land survey parties. One member of the group, Fred McLeod, D.L.S., on his back to Ottawa from the break break of the sub-Arctic. In a brief interview, referred to some of the things accomplished since last June by Dominion engineers operating in the Mackenzie River basin.

He explained that his colleagues and himself had seen lakes of 30 or 40 miles radius that had never been known to exist; inland areas, home of the Dog Ribs and other oddities, Indians, that had never before felt the pressure of a white man's foot; and a vast territory of water, waterfalls, formerly unknown, is on the Beaver River and measures from 300 to 400 feet across and falls rapidly descending for a depth of 50 feet.

He explained that his colleagues and himself had seen lakes of 30 or 40 miles radius that had never been known to exist; inland areas, home of the Dog Ribs and other oddities, Indians, that had never before felt the pressure of a white man's foot; and a vast territory of water, waterfalls, formerly unknown, is on the Beaver River and measures from 300 to 400 feet across and falls rapidly descending for a depth of 50 feet.

"YOUR FREE" FILLING MATERIALS

By RMA PROCTOR MCGHEE D.D.S., M.D., Author of "Oral Hygiene"

"Who invented fillings for teeth and the world was made of it? It was me. I will always remain a mystery."

We know that this work has been done from ancient times, but in recent years there has been such a dramatic increase in caries (decay of the teeth) that the prevention of decay and the repair of carious teeth has become an important subject to everyone.

There are three general classes of filling materials; plastic, silicate and metal.

The plastics are the various forms of dental cement and gutta-percha. The silicates are a form of translucent material that is an imitation porcelain. The colors of the teeth can be matched accurately and the material will last well, preserving the tooth and avoiding unsightly discoloration that would be present if a metal was used in the front of the mouth in a large cavity.

The metals used as filling materials are gold and amalgam, which is principally silver.

Gold and platinum were used for many years but they are now obsolete. A metal is used where there is great strain on the filling.

Amalgam, a mixture of alloy of silver made into a paste with mercury, is the most widely used filling in the world. It has done splendid service in the past and its use in the future is a secondary consideration.

Gold is considered the most permanent filling material and its use in the future is a secondary consideration. One is by making pure gold foil into the cavity and then making the filling in the tooth with the gold foil.

Another method is to use a metal to make the filling outside the mouth from a very accurate pattern of the tooth and then making the filling in the tooth with the metal.

Another method is to use a metal to make the filling outside the mouth from a very accurate pattern of the tooth and then making the filling in the tooth with the metal.

Another method is to use a metal to make the filling outside the mouth from a very accurate pattern of the tooth and then making the filling in the tooth with the metal.

USE SLOAN'S TO WARD OFF PAIN

Little aches grow into big pains unless ward off by an application of Sloan's Liniment.

For more than forty years Sloan's Liniment has helped thousands, the world over. You won't be an exception. It certainly does produce results. It is the only liniment that can be used on all parts of the body.

LOCAL NEWS

Wm. McLaws spent Thanksgiving in Calgary.

Miss Elsie McArthur visited Innisfail.

Sheff MacGregor sold a 2-year-old bay mare, taken under the stray animals ordinance, for \$3.50, on Tuesday.

Miss Gwendolyn Smith, of Calgary, and formerly of Bassano, was a visitor in town this week.

Sam Talkington returned from a trip to Saskatchewan where he disposed of some horses.

Don't forget the Women's Institute will drive at the Hunter hotel, on Friday, Nov. 18th.

Miss Lois Bryant, of Hussar, was in town for the dance on Monday.

Miss Evelyn Leash spent Thanksgiving with friends near Lundy.

Miss Lola Bryant and Percy Craig spent Thanksgiving with Mr. and Mrs. N. Bryant, at Hussar.

Betty Ross, who is attending the Calgary Normal School, spent Thanksgiving at her home in town.

An infant child of Mr. and Mrs. Osterberg's died last week, and was buried on Sunday, Rev. Mr. Lyttle conducting the funeral services.

The auxiliary electric plant carried the load for a few days last week while the water was being lowered at the dam.

Zoa Irene Parker, of Cassford, was married to Ralph Marks, of Cassford, by Rev. R. Lyttle, on Wednesday, November 9th, 1921.

Mary Edith Price, of Atlee, Alberta, was married to Robert H. Toepfer, of Jenner, by Rev. R. H. Lyttle, on Wednesday, November 9th, 1921.

B. F. Cryderman and Miss Russell, of the Bassano school teaching staff, attended the teachers' convention in Brooks last week.

Mr. and Mrs. E. C. Scribner and son, who have been spending the past three months with Mr. and Mrs. E. B. Udall, returned to Vermont this week.

The turkey shoot put on by the Gun Club on Saturday brought out the local shots, Dr. Scott, Bill Sambrook and Clyde Wilson got most of the birds.

Watson Crawford, of the Union Bank staff, has been moved from Bassano to Medicine Hat. Watson has been a resident of Bassano for over a year and has formed many warm friendships here.

The chicken supper given by the Ladies' Aid of the Presbyterian Church was a great success. The supper was excellent and many enjoyed the meal.

E. G. Allen, managing director of the Wrigley Printing Co., Vancouver, and formerly publisher of The Bassano News, spent a brief stopover in Bassano while on his way to the coast.

In spite of the cold a good crowd attended the dance at the rink on Monday night. These dances have been popular throughout the summer and fall, and many an enjoyable evening has been spent by the dancers.

John Scott, of Patricia, spent a few days in town. He was on the lookout for a number of purebred Guernsey cows he is importing from the United States. The shipment was held up by the floods east of Vancouver.

On Sunday the first snow of the year fell. Cold weather followed for a day or so, but a chinook wind coming along in the middle of the week, brought the temperature up. The ground is not frozen and the melting snow had an opportunity to soak in.

GRAIN PRICES

Winnipeg, Nov. 10.—The price of wheat broke badly to day just before the close and No. 1 Northern closed at 1.10 1-4. Wheat had advanced in spell of heavy selling drove the previous three days, but a new futures down to 1.07. Cash wheat remained fairly firm at the price above quoted. Cash price for oats 41 7-8, barley 57c, flax 1.74 1-2, rye 81 1-4.

Don. H. Bark, of Brooks, and A. V. McDougal, of Edmonton, were in town on Saturday acting as arbitrators in settling a financial dispute between the Janny Lind school district, on the Bow Slope, and an Edmonton contractor who built the school. The trustees claimed faulty work and asked for \$1500 allowance. The contractor claimed \$262 for extras. The board of arbitration allowed a net claim of approximately \$550 for the school district. The editor of The Mail was the third arbitrator.

THE HARDEST PLACE

The loneliest place on earth is a place where nobody understands you. And the place that is sometimes the hardest to fill, is the very one that demands you.

Then steady your nerve, and clear your brow, and quietly muster your forces. Make ready and watch, lest the demons of earth cut off all your cherished resources.

POLITICAL NOTES

The Liberals will not contest Bow River riding, W. W. Brown, president of the Liberal association, intimates.

Rice Sheppard, president of the political association of the U.F.A., has been nominated by the Labor party in West Edmonton to run against a Farmer nominee. Mr. Sheppard has been asked to resign by the U.F.A. directors.

Hon. T. A. Crerar told an audience in Preston, Ontario, that if the National Progressive party was elected to power, negotiations for reciprocity with the United States would be started.

At a political meeting held by Wm. Irvine, the Farmer-Labor candidate in Calgary, he took up a collection for election expenses and got \$25.

The Gleichen Call states that Premier Arthur Meighen will address a meeting that town in the interests of W. R. Fulton, government candidate in Bow River riding.

YOU CAN MAKE UP WITH THE BELROBE

FIRST The Belrobe saves you 1/4 to 1 1/2 yards on material—50c to \$10—because of its professional, individual layout chart.

NEXT It guides you in putting your garment together so that you attain the exclusive fit, drape and finish of an expert.

AND LAST It gives you Paris' own touch in finish—those all-important things upon which the success of your gown depends.

BEFORE you plan a single winter garment, select the styles you like best at our Design pattern counter. The Belrobe simplifies the making of the most elaborate gowns.

SPECIAL

FLANAGAN BROS. HARDWARE

LABOR SAVING HOUSE SUPPLIES

Food Choppers take their place as one of the greatest money savers in the kitchen. Dainty dishes can always be made from left overs and food choppers always suggest this practice.

We are now prepared to show you the handiest chopper ever made, easy to clean, and grinds fruits, meats, nuts and numerous other cooking supplies.

CASSEROLES

At this season of the year casseroles come into use more often than at other times, for puddings, meat pies, and many other uses. We have them lined with Pyrex or brown Guernsey ware. Bake them right in the oven and use them in the frame as an attractive table setting. A number of nice, new styles have just been placed in stock. If you cannot use one at home, keep them in mind as a serviceable Christmas gift.

SKATING TIME IS NEAR

Automobile Skates are the favorite skate with the hockey player. The Model B, with aluminum top, gives you the finest and best in skates. We recommend your purchasing the Automobile Skate, and we would further impress your mind with this information: we have your skate in stock, also your style, and the price is the same everywhere.

HOCKEY STICKS

Famous Mart Hooper brand. Come in and pick your stick right now.

RANGES AND HEATERS

If you require a range or heater you need go no further than this store for the best. We have Moffat ranges and Guernsey heaters and prices have been reduced to a very reasonable level.
